

Ninja *Kaze Version*

Versatile Hard Drive Service Tool

Data Recovery

HDD Test and Repair

HDD Duplication

HDD Wipe (Erase)

Special Data Extraction Functions

The Ninja's new Data Recovery Copy® function acquires data from unstable hard drives by reading damaged sectors and jumping unreadable sectors to acquire all usable data on a hard drive.

- 1) **Acquire Error-Sector Data** applies read-long command to acquire data from damaged HDD sectors that cannot be read by other data acquisition tools (UNC Errors)
- 2) **Skip Unstable Sectors** automatically jumps unreadable sectors to acquire maximum data using hardware and software HDD resets to maintain HDD integrity
- 3) **Adjustable Parameters** allows user to image HDD forward & backward, extend sector-read attempts, timeouts and power on/off time to maximize acquisition

Must-Have Feature for Data Recovery

Test, Wipe and Repair Functions

There is no faster hard drive duplicator in the world than the Ninja. This duplicator boasts over 4 GB/min max copy speed and Data-Only Copy features for any Operating System.

- DoD Wipe
- Low Level Format
- Bad Sector Repair
- HPA On/Off Control
- Sector Test
- SMART Test
- Quick Test
- Extended Test

Features

- ❖ **Duplication**
Data-Only Copy and Mirror-Copy options. Speed up to 4 GB per minute
- ❖ **Data Recovery**
Recover data from damaged or unstable hard drives
- ❖ **HDD Test**
Quick Test, SMART check, full HDD inspection, life cycle tests
- ❖ **Bad Sector Repair**
Copy to DD Image File and verify with MD5 Hash algorithm.
- ❖ **Data Destruction**
DoD, HPA & NSA Compliant
- ❖ **Universal Support**
Supports any brand & model ATA or SATA I/II hard drive standard package supports 3.5" and 2.5" ATA, SATA I/II (adapters needed for other types)

Full HDD Life Cycle Management
