What's NEW for 2005? Pc-Check is now fully bootable from a CDROM, and you can make disks versions too! You wanted improved reporting and AC'97 Audio testing. We have even thrown in system stress testing. *Check out the list below for the latest features and benefits.* Visit www.eurosoft-uk.com/pc_check.com >Pc-Check® Get It Upgrade v6.00

Pc-Check® is now in its 18th year! No other diagnostic has more years of testing behind it! Oh, and just like our QA+® Diagnostic Software, remember to update your Pc-Check® testing methods! Upgrading your Pc-Check® program keeps your hardware testing methods current. **Upgrades sent to you automatically for 1 year!!**

NOTE: Upgrade features apply to Virtual Pc-Check. EXTENDS YOUR TESTING VALUE!!

NEW! Pc-Check® Features

- Really NEW!!! Pc-Check available and bootable from a CDROM
- NEW!!! AC'97 audio tests
- NEW!! FireWire controller tests
- NEW!! Interactive command line options
- NEW!! System stress test
- Enhanced self-boot operating system
- Enhanced serial port testing
- Enhanced DVD drive testing
- Faster drive library start up

The Benefits to You

- ...increase testing coverage, bootable from the CDROM drive. Test PCs without a floppy drive more easily. Also includes Pc-Check v4.54 for testing older PCs without a CDROM drive.
- ...confirm the functionality of most popular Intel, AMD and VIA on-board audio chipsets with both synthesised and streamed audio.
- ...providing universal support for information and verification of your FireWire controller hardware. Performs packet DMA testing and aids compliance level determination.
- ...hot key activation allows quick and easy selection of session test scripts.
- ...performs simultaneous hard disk, CDROM, memory and processor activity to check system stability and identify problems that may not occur when components are tested individually.
- ...changes to the EuroDOS operating system permits results output to hidden FAT diagnostic partitions.
- ...detect and test up to 8 serial ports on electronic point of sale systems with the new ePoS option.
- ...using Eurosoft's DVD Test Disk, test that the DVD drive is able to read Format 9 (dual layer) DVDs with the new multi-layer DVD laser refocus test.
- ...user selectable time out value plus more efficient memory use when base memory is tight.
